

MOBILE TOILET CABINS

- Technical specification

Construction

Sandwich construction of an insulated polyurethane core covered with plastic coated aluzinc sheet on both sides. Roof made of galvanised steel plate with riveted edges. In the waste tank model, the toilet module of non-skid patterned, fibre glass reinforced plastic polyester is seamlessly attached to the walls. The door is made of the same material as the walls.

Equipment

Complete electrical ventilation for lighting and heating fan. 3-pole mains inlet for connection to 1-phase 240V/16 A electrical outlet. The cabins are equipped with GFCI (ground fault circuit interrupter). Washbasin with water tap (not in T-Disabled and TV4-versions), waste paper basket, toilet paper holder, clothes hook, mirror, locking devise. 25 litre fresh water container with foot pump in the T500-version. Ceramic toilet bowl in the WC-version. Lifting ey bolts.

Ventilation

Disk valves for natural ventilation. The waste tank is separately ventilated.

Waste tank

The waste tank is made of rotation cast plastic which is resistant to heat/cold and mechanical effect. The tank is an independant unit, integrated in the cabin. To be filled with a water and disinfectant mixture before taken into use. Drainage by sludge suction.

Waste tank capacity

Model: T500 approx. 1600 visitors
 TV1 approx. 1600 visitors
 TV4 approx. 2000 visitors
 T-Disabled approx. 2000 visitors

Wheel chassis

TV1: One-axeled, brakeless galvanised wheel chassis with towing devise for a 50 mm tow hook. Detachable towing fork.
TV4: One-axeled, galvanised wheel chassis with brakes and towing devise for a 50 mm tow hook. The toilet trailer is inspected according to local regulations prior to delivery and may be towed at 80 km/h.

T500 with wheel chassis

T-Disabled
Waste tank toilet cabin with two cubicles, one of which with accessibility for partially disabled people

Mobile Toilet Cabins from Danfo

Our high quality mobile toilet cabins are available in various versions - all being insulated for use all-the-year-around.

The cabins are furnished either with a waste tank for drainage by sludge suction or with a water flushing toilet bowl for connection to water supply and sewer system.

All units are easy to transport and to move and are used permanently or periodically in places such as golf courses, camping sites, construction sites, manufacturing industry estates etc.

MOBILE TOILET CABIN - Interior

T500 with waste tank

The floor and toilet seat being cast in one piece of fibre glass reinforced plastic makes the T500 model very durable and easy to clean. The cubicle is furnished with a washbasin with water tap and one 25 litre water container. Can be fitted on a wheel chassis (TV1).

WC-model

The WC-model is furnished with a water flush ceramic toilet bowl and a plastic washbasin. To be connected to water supply and sewer system.

T-Disabled

This toilet cabin contains one cubicle with accessibility for partially disabled persons and one normal sized, unisex cubicle. The interior is the same as in the T500-version, however without washbasin and water container.

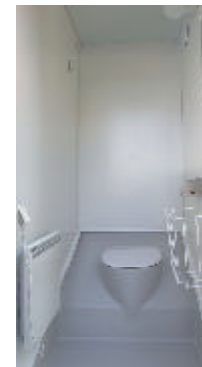

TV4

The interior of the TV4-version is one cast piece similar to the one in the T500-version, however the cubicles are smaller and not furnished with washbasin and water container.

Durable interior - easy to clean
